

Automated Browser Test for JIRA

Test Requirements:

Tests should verify that

- New issues can be created
- Existing issues can be updated
- Existing issues can be found via JIRA's search

Test Environment:

Test Framework: Selenium 2.0

Test Language: Python 2.7.3

Browser: Firefox

Test Files:

Test.py

pageobject.py

Test Cases:

test_login() : log in JIRA("https://jira.atlassian.com/browse/TST")

test_creat() : creat a new issue

test_search() : search for a existing issue

test_update() : search for a existing issue and update it
